Figure 1: A 28x28 grid of small heatmaps showing cell distribution. Each heatmap is a 4x4 grid of blue squares, with a central black square containing a white dot representing a cell. The heatmaps are arranged in a 28x28 grid, with each heatmap corresponding to a coordinate (x, y) from 15 to 28. The heatmaps show varying degrees of cell density, with some being more concentrated than others.
